THE CHOICE OF LIVESTOCK PROFESSIONALS

IMPROVE THE EFFICIENCY & SAFETY OF YOUR OPERATION

ProWay's Adjustable Cattle Race offers lever operated flexibility, efficiency and safety. The Adjustable race can be simply adjusted from 850mm to 600mm at increments of 50mm. This ensures cows and calves can be processed in the same race, minimising required infrastructure whilst also saving you time.

- Adjustable from 850mm to 600mm at increments of 50mm.
- Stops smaller cows or calves from being able to turn around in the race.
- Eliminates necessity for a calf race.
- Optional overhanging rail allows unrestricted access to cattle.
- Adaptable to straight and curved races.
- Can be adapted to suit Pneumatic or sliding race gates.

QUICKLY ADJUST WITH LEVER AS REQUIRED

STOPS SMALLER CATTLE TURNING AROUND

ADJUSTABLE AT INCREMENTS OF 50MM

THE CHOICE OF LIVESTOCK PROFESSIONALS

MAXIMISE STOCK FLOW

ProWay's V-Race allows for efficient processing of varying sized cattle. With the race narrowing toward its base into its 'V' shape, reducing the chance of smaller stock turning around. The V-Race includes a fully sheeted outer arc promoting stock safety and a 3/4 sheeted inner arc to allow for visibility and access to stock.

- Fully sheeted outer arc prevents legs and heads getting out, whilst improving stock flow.

- Outer arc sections are release gates that can be quickly unbolted to free stock that may be caught or overturned.

- 3/4 Sheeted inner arc allows visibility and easier access to stock.

- 'V' profile minimises the chance of smaller stock turning around in the race.

- The curved design offers better draw up the race, with stock circling past the operator.

- Option extras include sliding gates at key points, Pneumatic Remote Operated Block Gates and elevated walkways.

FULLY SHEETED OUTER ARC PROMOTES STOCK FLOW AND PREVENTS LIMBS BEING CAUGHT

3/4 SHEETED INNER ARC OFFERS VISIBILITY AND ACCESS

OPTIONAL ELEVATED WALKWAYS
