

ProWay have developed the Plug and Play air operated product range as a simplified pneumatic upgrade for producers looking to improve safety and efficiency in cattle yard working areas.

The Plug and Play product range center around a bolt to slab draft module (3, 4 or 5 way draft) which has the Pneumatic Control box mounted above the frame. The control board, pneumatic actuators and solenoid valves are fitted and ready for connection to power and air supply.

PNEUMATIC SOLUTIONS TAILORED TO YOUR OPERATION

Developed to improve functionality, ProWay Plug and Play equipment is available in varied formats including:

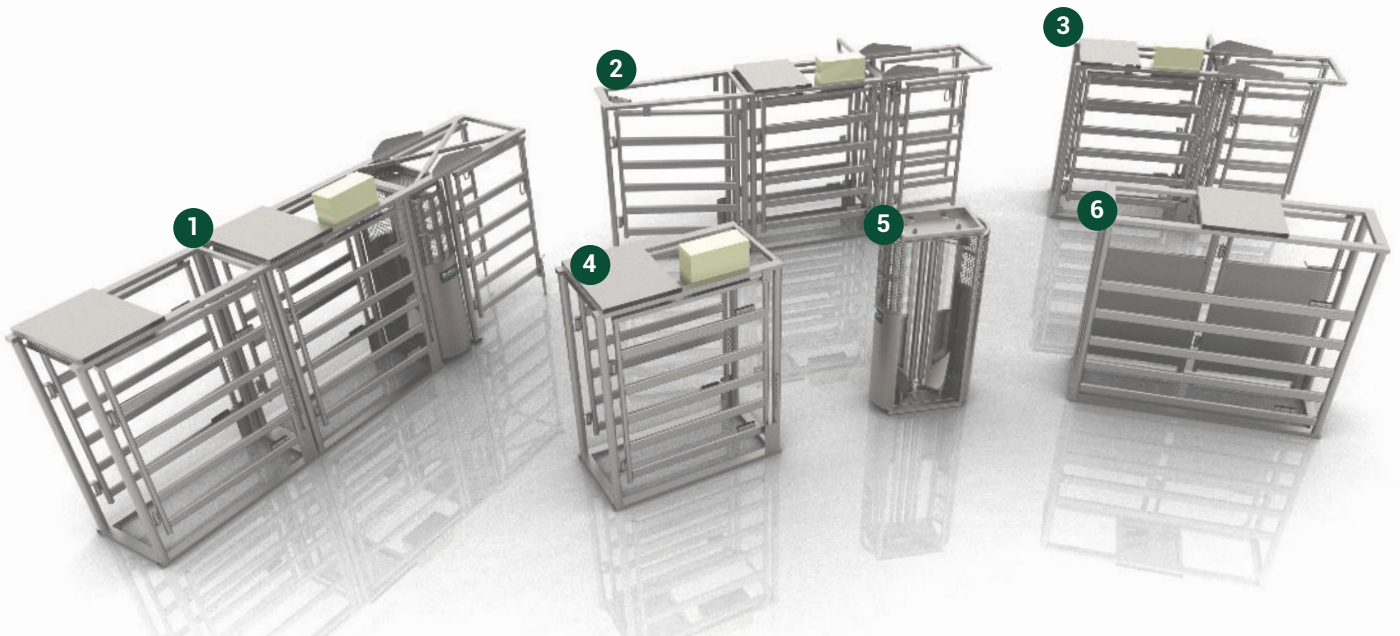

- Remote controlled drafting (3, 4, and 5-Way options) designed for front of crush/headbail.
- All plug and play drafting systems come with a battery remote synced to the supplied control box, 240V power socket, 1/4" Nitto style air fittings for 15mm hose input, and relevant connection points at each product.
- Additional Rotary Block Gates can be added to the control unit allowing management of stock flow in the working race.
- Optional In-Race Draft Units can be connected to the control box to divert cattle before the crush.

Options to suit varied scale cattle operations, ProWay Plug and Play systems provide:

- Significantly improved safety for the operator with remote functionality.
- Increased labour efficiency and ease of operation in the main working area.
- Improved animal welfare with less stress, reduced confinement time and minimal bruising on stock.
- Simplified installation, the Plug and Play product range is designed as a DIY solution.
- Products that can be easily relocated and reused in any future yard upgrades.
- Multiple productivity advantages. Faster processing means less time in the yards and less time off feed.

Ideal for producers or processors with a serviceable race, crush, or facilities that require pneumatic drafting. The Plug and Play options facilitate a simple install to achieve an efficient air powered operation.

Standard Plug and Play Range :	Control Box	Draft Options
1 Pneumatic Draft Module with Rotary Block Gate Complete remote control of all gates. Designed to be installed in front of crush with access gates allowing treatment of cattle in headbail.	Yes	Available in 3, 4, or 5-Way Modules
2 Pneumatic Draft Module with Additional 2-Way Draft Remote drafting with an upgraded 2-way draft in front of the standard modules gives further draft flexibility. Includes lock-in access gates for head and neck husbandry operations.	Yes	4-Way Module
3 Pneumatic Draft Module with Sliding Gate Remote drafting with ProWay's flagship draft module allows safe and efficient drafting in front of a crush or headbail. Includes access gates for head and neck husbandry operations.	Yes	Available in 3 or 5-Way Modules
4 Standalone 3-Way Draft Unit Remote drafting without the standard headbail access gates, this unit is designed for facilities with existing gates in front of a crush, or for 3-way drafting in a working race.	Yes	3-Way Module
5 Rotary Block Gate Additional Rotary Block gates can be connected to a draft module with a plug and play control box. These gates allow remote control of cattle flow in a working race.	No	N/A
6 In-Race Draft Module The In-Race draft can be connected to a draft module with a plug and play control box. This module allows drafting from the race into an adjacent holding pen.	No	2-Way Draft

The Plug and Play concept is fully self-contained and assembled.
No specialist knowledge of pneumatics is required.

Full documentation, maintenance and operation instructions are provided with each system.

PNEUMATICS PLUG & PLAY SYSTEM

Current at: 23 May, 2025

Cattle Autodrafters, Manual and Remote Drafters

Cattle "Plug & Play" Pneumatic 3 Way Drafter with Access Gates

\$16,215.00 (ex GST)

- Remote drafting with ProWay's flagship draft module allows safe and efficient drafting in front of a crush or headbail.
- Access gates for head and neck husbandry operations.
- 1 x Manual Sliding Gate
- Made from 97 cattlerail, is strong and non-bruise
- The Plug & Play concept is fully self-contained and assembled. No specialist knowledge of pneumatics is required. Full documentation, maintenance and operating instructions are provided with each system.

\$17,835.00 (inc GST)

Cattle "Plug & Play" Pneumatic 3 Way Drafter with Access Gates & 1 x Rotary Block Gate

\$23,265.00 (ex GST)

- 3 way pneumatic drafter, designed to be installed in front of crush with access gates allowing treatment of cattle in
- 1 x Rotary Block Gate
- Complete remote control of all gates.
- Made from 97 cattlerail, is strong and non-bruise
- The Plug & Play concept is fully self-contained and assembled. No specialist knowledge of pneumatics is required. Full documentation, maintenance and operating instructions are provided with each system.

\$25,595.00 (inc GST)

Cattle "Plug & Play" Pneumatic Standalone 3 Way Draft Unit

\$11,160.00 (ex GST)

- Remote drafting without the headbail access gates, this unit is designed for facilities with existing gates in front of a crush, or for 3 way drafting in a working race.
- Made from 97 cattlerail, is strong and non-bruise
- The Plug & Play concept is fully self-contained and assembled. No specialist knowledge of pneumatics is required. Full documentation, maintenance and operating instructions are provided with each system.

\$12,275.00 (inc GST)

Cattle "Plug & Play" Pneumatic 4 Way Drafter with Access Gates

\$19,900.00 (ex GST)

- Remote drafting with ProWay's flagship draft module allows safe and efficient drafting in front of a crush or headbail.
- Access gates for head and neck husbandry operations
- 1 x Manual Sliding Gate
- Made from 97 cattlerail, is strong and non-bruise
- The Plug & Play concept is fully self-contained and assembled. No specialist knowledge of pneumatics is required. Full documentation, maintenance and operating instructions are provided with each system.

\$21,890.00 (inc GST)

PNEUMATICS PLUG & PLAY SYSTEM

Current at: 23 May, 2025

Cattle "Plug & Play" Pneumatic 5 Way Drafter with Access Gates

\$23,110.00 (ex GST)

- Remote drafting with ProWay's flagship draft module allows safe and efficient drafting in front of a crush or headbail.
- Access gates for head and neck husbandry operations.
- 2 x Sliding Gates
- Made from 97 cattlerail, is strong and non-bruise
- The Plug & Play concept is fully self-contained and assembled. No specialist knowledge of pneumatics is required. Full documentation, maintenance and operating instructions are provided with each system.

\$25,420.00 (inc GST)

Cattle "Plug & Play" Pneumatic 5 Way Drafter with Access Gates & 2 x Rotary Block Gates

\$37,160.00 (ex GST)

- 5 way pneumatic drafter, designed to be installed in front of crush with access gates allowing treatment of cattle in headbail.
- 2 x Rotary Block Gates
- Complete remote control of all gates.
- Made from 97 cattlerail, is strong and non-bruise
- The Plug & Play concept is fully self-contained and assembled. No specialist knowledge of pneumatics is required. Full documentation, maintenance and operating instructions are provided with each system.

\$40,880.00 (inc GST)

Cattle "Plug & Play" Pneumatic In-Race Draft Module

\$8,950.00 (ex GST)

- The In-Race Draft can be connected to a draft module with a plug and play control box. This module allows drafting from the race into an adjacent holding pen.
- Made from 97 cattlerail, is strong and non-bruise
- The Plug & Play concept is fully self-contained and assembled. No specialist knowledge of pneumatics is required. Full documentation, maintenance and operating instructions are provided with each system.
