

## THE CHOICE OF LIVESTOCK PROFESSIONALS

## ELEVATE MOB MANAGEMENT, SHEEP HUSBANDRY & DATA CAPTURE

ProWay Livestock Equipment offer a fit for purpose Sheep Classing Box designed to streamline your sheep management processes, ensuring efficiency, accuracy, and animal welfare.

The Classing Box features lever operated sliding gates at both entry and exit, and is designed to sit within a traditional working race to assess sheep and rams. The Classing Box provides a secure setup for evaluating wool quality, including fibre length, density, and cleanliness, as well as a controlled environment for detailed examination of rams, ensuring optimal breeding selection.

The Classing Box has been refined with leading wool and sheep producers throughout Australia to ensure adequate strength and features for professional operators. The frame, featuring a reinforced checker plate floor can be mounted easily to weigh scales while an indicator can be mounted for data collection.

Upgrade genetic selection and mob management with ProWay's Australian made Sheep Classing Box.

- Suitable for a variety of sheep and stud management tasks, from fleece inspection to reproductive health assessments.
- Adjustable width sheeted side that can be mounted with a panel reader.
- Side sampling doors for fleece assessment with a jump bar to prevent animals escaping.
- Extended handles for entry and exit sliding gate control.
