

PROCESS SHEEP SAFELY IN A TIMELY MANNER

The ProWay Sheep Rotary Force has been designed as a safe and efficiency lead up to individual sheep handlers, classing boxes or scan crates. The Sheep Rotary Force features a Curved Adjustable Race maximising sheep flow.

The Sheep Rotary Force follows the design concept of our Cattle Rotary Force, with the ratchet gate moving around the pen, compressing larger numbers of sheep into a single file in the Curved Race.

- Safely compresses large numbers of sheep into a single file
- Sheeted Force is paired with a sheeted Curved Adjustable Race, offering exceptional sheep flow without compromising animal welfare
- Ideal lead up for individual handlers, scan crates or classing boxes
- Ratchet gate safely moves around the holding pen as required reducing pen size

**SHEETED FORCE
IS PAIRED WITH
A CURVED
ADJUSTABLE RACE**

**IDEAL LEAD UP
FOR INDIVIDUAL
HANDLERS**

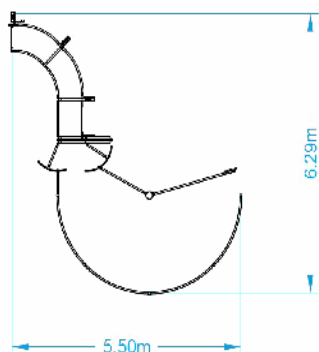

**SAFELY COMPRESS
LARGE NUMBERS
INTO A SINGLE FILE**

The following designs are a starting point for your operation to give an idea of design options and yard features available.

Designs can be modified to suit your requirements and features or equipment can be included or subtracted in the final design. We can incorporate existing fences and infrastructure as part of our custom design service as well as offer sections of these designs such as the working area.
