## DURABLE AND EFFICIENT PROTECTION FROM THE ELEMENTS

**ProWay have developed a simple and effective Roll Over Roof system for the Contractor Bulk Handler.**

**Building on the ethos of efficient setup at multiple yard sites, this innovative addition functions like a roll tarp for a semi-trailer, providing essential shade and weather protection while you process and treat sheep.**

Setting up the Roll Over Roof is quick and easy for a single operator, taking less than a minute to setup with no heavy lifting, poles or ropes required.

Simply fold out the support arms either side of the handler and effortlessly wind out the canvas roof, ensuring yourself and the handler are protected from the elements.

The canvas is easily extended over the frame with an extended handle which is suspended out of the way when the Bulk Handler is in use.

- Simple one person setup in under a minute
- Provides shade and protection from the elements when using the handler
- Fully integrated in the Bulk Handler frame with no extra parts to carry
- Easily rolls away and locks in place for transport and when not in use
- Durable canvas cover supported by galvanised fold-out support arms
