

THE CHOICE OF LIVESTOCK PROFESSIONALS

MODULAR VARIATION FOR OPERATIONAL SUITABILITY

ProWay Wool Bins are reliable, modular variations that can be easily customised to suit your facility and shearing requirements. ProWay's steel frame, sheeted Wool Bins as part of your shearing shed fitout. A single Wool Bin consists of an RHS frame and 2 walls, while consecutive walls can be bolted on to increase capacity and add additional lines to your wool holding. Rear doors are sheeted to full height and swing out of the way for access when pressing, while front doors are sheeted half way. ProWay Wool Bins are supplied flat packed with simple bolt together assembly with fully galvanised construction for longevity.

- ProWay can supply steel frame, sheeted wool bins as part of your shearing shed fitout.
- A single wool bin consists of an RHS frame and 2 walls, while consecutive walls can be bolted on to increase capacity and add additional lines to your wool holding.
- Optional sheeted doors can be supplied and fitted at the front and/or rear. These can be used to keep the clip from spilling into the wool room.
- Rear doors are sheeted to full height and swing out of the way for access when pressing, while front doors are sheeted half way.
- Supplied flat packed with simple bolt together assembly.
- Fully galvanised construction for longevity.
- 1305mm wide x 2490mm depth x 2200mm high
