OF LIVESTOCK
PROFESSIONALS**

HIGHLY EFFICIENT AND QUICKLY ADJUSTS TO SUIT VARYING SIZE SHEEP

The Adjustable V-Draft Race is a suitable draft or handler lead up for varying size sheep. The Adjustable V-Race can be easily narrowed at the base to ensure sheep approach in a single file. The V-Race is supplied with 'tumble swing' gates at both ends which be used to block an entrance or exit when not in use.

The Adjustable V-Race can be supplied with removable draft gates so a weigh crate or auto-drafter can be easily substituted where necessary. The ProWay Adjustable V-Race is the ultimate tool for quickly and safely drafting sheep, and can be fitted as a permanent in ground unit or on a dynabolted frame which can be transported if required.

- Easily adjustable to suit larger breeds, shorn sheep or lambs which prevents turning around
- 'Tumble swing' gates can quickly block an entry or exit
- Exit end features draft stoppers which allow draft gates to swing out of the way for access
- Full sheeted sides ensure sheep are well protected when drafted
- Can be supplied as a permanent installation or on a frame for transportation

CAN BE INSTALLED AS PERMANENT INFRASTRUCTURE OR ON A FRAME THAT CAN BE SUBSTITUTED

SAFELY AND EFFICIENTLY DRAFT IN A SINGLE FILE

EASILY ADJUSTABLE TO SUIT LARGER BREEDS, SHORN SHEEP OR LAMBS

THE CHOICE OF LIVESTOCK PROFESSIONALS

SAFELY DRAFT WHILST CONTROLLING SHEEP FLOW

The ProWay Serpentine Draft has been developed to safely manage stock flow when drafting larger breed sheep.

The unique 'S' shape has been proven to encourage stock flow whilst preventing sheep from baulking or coming through too fast to split the mob accurately. The combination of the tight curve and tapered sides means speed is restricted, giving the operator time to draft. This ultimately provides ideal drafting and stock flow.

- Unique 'S' curve prevents sheep baulking or coming through too quickly
- The sheeted curve encourages sheep to watch their feet, leaving them less focused on the operator
- Designed to maximise sheep flow, animal welfare and operator control

SHEEP DRAFTING RACES

Current at: 21 May, 2025

Sheep Drafting Race

| | |
|---|----------------------|
| Adjustable V Draft Race | \$2,985.00 (ex GST) |
| - Adjusts in at the bottom creating a "V" | \$3,285.00 (inc GST) |
| - Tumble swing gates at entry and exit of draft | |
| - Heavy duty construction for durability | |
| - Pivots from top, for ease of confining sheep | |
| - The draft has swing away draft stoppers, which allows gates to swing away for access or to fit in a weigh crate | |
| - Does not include draft gates | |
| - Proudly designed & manufactured In Australia | |
| | |
| 2 x 1.1m Drafting Gate (includes post) | \$785.00 (ex GST) |
| - All galvanised construction | \$860.00 (inc GST) |
| - Rubber hose on front post to deaden noise | |
| - Safety handles to protect hands from jumping sheep | |
| - Hinges and posts included | |
| - Proudly designed & manufactured In Australia | |
| | |
| 2 x 1.6m Drafting Gates Includes Posts | \$800.00 (ex GST) |
| - All galvanised construction | \$880.00 (inc GST) |
| - Rubber hose on front post to deaden noise | |
| - Safety handles to protect hands from jumping sheep | |
| - Proudly designed & manufactured in Australia | |
| | |
| Adjustable V Draft Race on a Frame | \$3,730.00 (ex GST) |
| - Comes on galvanised RHS frame | \$4,105.00 (inc GST) |
| - Adjusts in at the bottom creating a "V" | |
| - Tumble swing gates at entry and exit of draft | |
| - Heavy duty construction for durability | |
| - Pivots from top, for ease of confining sheep | |
| - Does not include draft gates | |
| - Proudly designed & manufactured in Australia | |
| | |
| 2 x 1.1m Drafting Gates on a Frame | \$880.00 (ex GST) |
| - Comes on galvanised RHS frame | \$965.00 (inc GST) |
| - All galvanised construction | |
| - Rubber hose on front post to deaden noise | |
| - Safety handles to protect hands from jumping sheep | |
| - Proudly designed & manufactured in Australia | |
