MAKING SHEEP HANDLING MORE EFFICIENT, SAFE & PROFITABLE

ProWay's Dual Adjustable Width Sheep Race is the ultimate infrastructure for processing varied sized sheep and lambs. The ease of adjustment offers efficient scaling between 600mm & 380mm centre-to-centre, minimising required equipment whilst saving you time.

Panels are braced at each pivot point, with the race supplied in up to four sections for a total race length of up to 13.2m.

- Adjustable between 600mm to 380mm centre-to-centre
- Panels are braced at each pivot point and can be supplied in our oval or pipe sheep rail ranges
- The Race can be supplied in up to four parts, totalling 13.2m in max length
- Stops lambs and smaller sheep from turning around
- The ideal lead up for handlers and auto-drafters offering maximum sheep flow
- Optional end flip gate offers greater productivity
